Dear Professor Goldziher,

I have taken what is obviously  
the right course with "سبلل زلي" <sup>سبلل زلي</sup>  
in having the MS (B. m. or 7782)  
photographed for your benefit. Apart  
from the lack of any one here to deal  
with the work by your suggested article  
in the J.R.A.S. - I have neither the  
time nor the knowledge required -  
it is clearly from you that everyone  
would desire to have an account of

The Contents: you will know how  
much of it is new, & less that shall  
be tested, & we shall all await the  
result with much interest. As the  
photographs are your own property, you  
can take your own occasion for  
utilizing them. If it were agreeable  
to yourself I know well how glad  
Becker would be to put the pages  
of 'A. Thain' at your disposal, & thus  
would have the further advantage  
of giving him some needed rest

from half filling its pages himself.  
For he has just written to me that his  
health is not yet restored, nor can  
I think that his recent lecturing  
in Leiden can have improved it.

I hope that your own health is  
satisfactory, & that you will soon  
see, with approval, the January  
No. of the J.R.A.S.

Yours truly  
J. F. A. Medley

P.S. Lakki Pacha has lately  
sent me a box of Sweets.
